-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to a method of manufacturing compartmented file folders with two work stations and securing an edge of a first internal divider to an edge of a third of the file folder components.
 - II. Claims 18-22, drawn to a method of manufacturing compartmented file folders including applying tape to front and rear panels.
 - III. Claims 23-26, drawn to a method of manufacturing compartmented file folders with aligning panels with dividers as the dividers are delivered to a divider installation station.
 - IV. Claim 27, drawn to a method of manufacturing compartmented file folders with internal dividers and two separate taping steps of front and rear panels to dividers.
 - V. Claim 28, drawn to a method of manufacturing compartmented file folders with taping one internal divider to a second internal divider.
1. Inventions I-V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions all have different modes of operation which yield different effects. Each operation in the above described group is accomplished by a different mode of operation. The invention of Group I performs work at two separate

Art Unit: 3721

stations and secures an edge of a first internal divider to an edge of a third internal divider. The invention of Group II performs an operation of applying tape to front and rear panels of a folder. The invention of Group III performs an aligning function as the dividers are delivered to a divider installation station to be combined with the folders. The invention of Group IV performs two separate taping steps of front and rear panels to dividers. The invention of Group V performs only one taping step but tapes one internal divider to a second internal divider.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

2. A telephone call was made to Richard Multer on 2/10/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

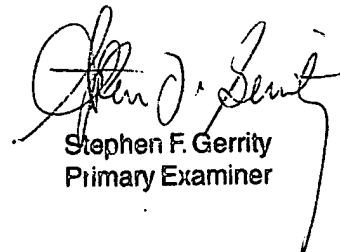

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher R Harmon whose telephone number is (571)272-4461. The examiner can normally be reached on Monday-Thursday from 8-6.
